

Rakesh Chourasia

Network Engineer

Patna, Bihar, India | +91 6306390570 | Rakeshchourasia100@gmail.com

Professional Summary

Results-driven Network Engineer with 2 years of proven expertise in designing, implementing, and optimizing complex enterprise network architectures. Specializes in routing and switching, network security, and proactive performance monitoring. Adept at troubleshooting intricate connectivity and latency issues to ensure high availability for business-critical operations. Passionate about leveraging the latest networking technologies to build scalable, fault-tolerant, and secure digital environments.

Professional Experience

Metconnect Infotech Pvt Ltd

Network Engineer • Full-time

07/2024 – Present

Patna, Bihar, India

- Configured and managed Cisco routers and Catalyst 9000 switches across multiple sites, improving overall network throughput by 30% and reducing latency.
- Designed and implemented robust firewall policies using Palo Alto Networks and Cisco ASA, integrating Intrusion Prevention Systems (IPS).
- Deployed IPsec and SSL VPN solutions, successfully securing sensitive corporate data and facilitating high-speed remote access.
- Administered enterprise monitoring tools (SolarWinds, PRTG, Wireshark) to proactively detect anomalies, maintaining an SLA of 99.9% uptime.
- Executed automated network provisioning and backups using custom Python scripts (Netmiko) and Ansible, reducing manual configuration time by 40%.
- Collaborated with systems administrators to execute legacy infrastructure upgrades with zero unplanned downtime during peak business hours.

Key Projects

Enterprise Network Architecture Overhaul

03/2025 – 06/2025

- Spearheaded the redesign of the core and distribution layers for a medium-scale campus network, migrating to dynamic OSPF and BGP routing protocols.
- Configured High Availability (HA) protocols such as HSRP and VRRP on core multilayer switches, ensuring uninterrupted routing services.
- Established comprehensive Quality of Service (QoS) policies to prioritize delay-sensitive VoIP and video conferencing traffic.

Datacenter Network Migration to Cisco Nexus

12/2024 – 02/2025

- Facilitated the phased migration of a legacy datacenter infrastructure to a modern Cisco Nexus environment (Nexus 9000/7000 series).
- Configured Virtual PortChannels (vPC) to provide active-active multipathing, doubling the available bandwidth for critical server racks.
- Assisted in the deployment of VXLAN over a Spine-and-Leaf topology to seamlessly extend Layer 2 domains.

Secure Remote Access Infrastructure

10/2024 – 12/2024

- Engineered a scalable SSL VPN and IPsec architecture to support secure operations for a dispersed workforce of up to 150 concurrent users.
- Integrated Multi-Factor Authentication (MFA) via Cisco Duo and configured centralized RADIUS/TACACS+ servers to enforce strict access control.

Campus-Wide Wireless Infrastructure Upgrade

08/2024 – 10/2024

- Led the deployment of high-density Cisco Wireless LAN Controllers (WLCs) and 50+ lightweight Access Points across three enterprise office floors.

- Performed comprehensive wireless site surveys to optimize AP placement, minimize co-channel interference, and eliminate RF dead zones.
- Implemented IEEE 802.1x authentication with EAP-TLS for the corporate SSID, ensuring secure internal network access.

Network Automation and Monitoring Dashboard

07/2024 – 09/2024

- Developed a scalable suite of Python scripts to automate daily configuration backups, firmware compliance checks, and health polling of network devices.
- Deployed a Zabbix-based centralized monitoring dashboard, configuring custom SNMPv3 traps to notify the IT team of hardware failures in real-time.
- Decreased Mean Time to Resolution (MTTR) for outages by 25% through immediate SMS/email alerting and automated syslog gathering.

Education

Bachelor of Technology in Computer Science and Engineering

Sree Dattha Institute of Engineering and Science, Hyderabad

01/2023

GPA: 7.9 CGPA

- Relevant Coursework: Computer Networks, Data Communications, Cryptography & Network Security, Operating Systems.

Diploma in Computer Science and Engineering

Tomi Polytechnic College, Basar, Arunachal Pradesh

01/2020

GPA: 8.2%

Certifications

- Cisco Certified Network Associate (CCNA)05/2024
- CompTIA Network+11/2023
- Palo Alto Networks Certified Network Security Administrator (PCNSA) – In ProgressExpected 09/2026

Technical Skills

Networking Protocols	OSPF, BGP, EIGRP, RIP, VLANs, STP/RSTP/MSTP, VTP, HSRP, VRRP, GLBP, IPv4/IPv6 Subnetting, QoS, NAT/PAT, vPC, VXLAN
Security & Firewalls	Cisco ASA, Palo Alto Networks, Fortinet, IPsec VPN, SSL VPN, Access Control Lists (ACLs), Port Security, IEEE 802.1x, RADIUS, TACACS+
Network Management	Wireshark, SolarWinds, PRTG, Zabbix, Cisco ISE, Cisco Packet Tracer, GNS3, EVE-NG, Ekahau Site Survey
Programming & Auto.	Python (Netmiko, Paramiko, NAPALM), Ansible, Bash Scripting
Operating Systems	Windows Server (Active Directory, DNS, DHCP), Linux (Ubuntu, CentOS), Cisco IOS, Cisco NX-OS
